Q3 2017-2018

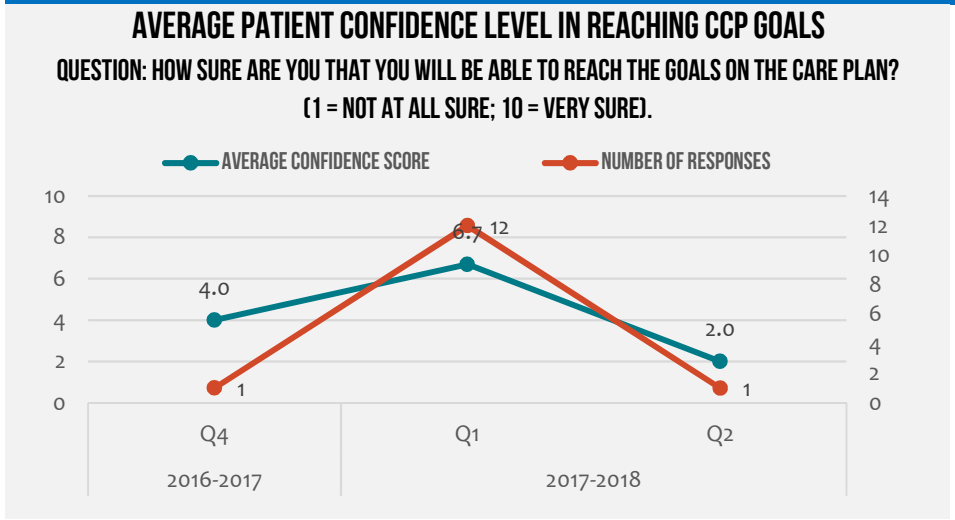
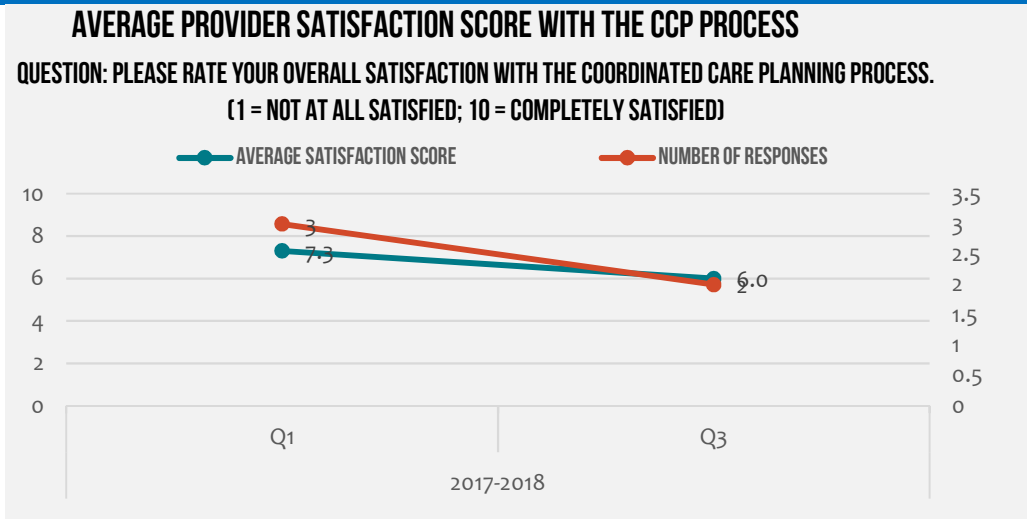
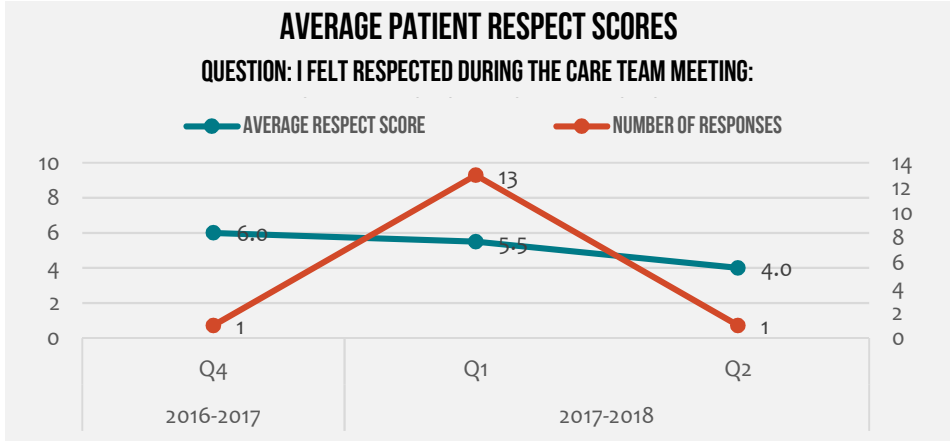
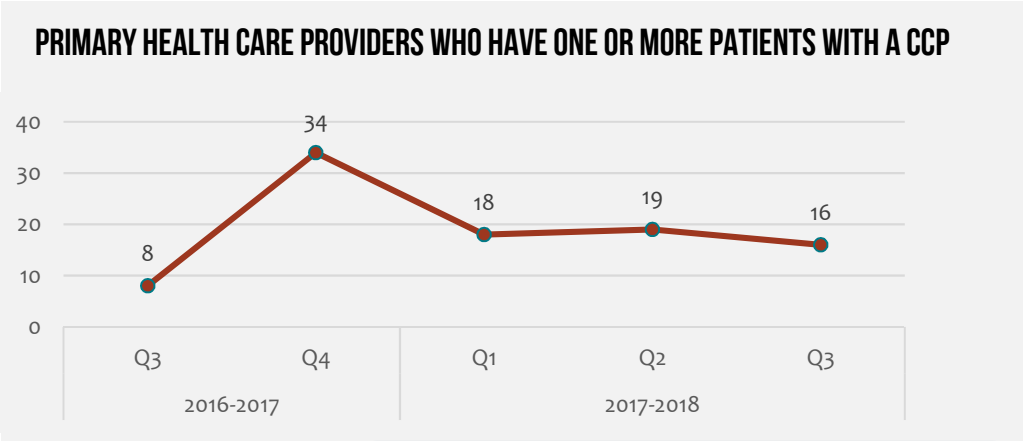
BALANCING MEASURES









> It was good, and it was helpful. Everyone is one the same page now, so that is good.

- Patient

> I thought it was really helpful , as a caregiver was feeling overwhelmed and needed more respite time, I was getting burned out and it was addressed.

- Caregiver

> Valuable process for information sharing for both client and caregivers/providers. Ensures all those involved are aware of goals.

- Provider
