Sub-region Integration Table – Grey Bruce
Meeting Highlights – November 7, 2017

The Grey-Bruce Sub-region Integration Table held its monthly meeting on Tuesday, November 7, 2017 at the South West LHIN Owen Sound office.

Meeting Highlights

- Members were provided with an overview of *Sub-Region at a Glance* performance data profiles (attached) for Grey Bruce (GB), as well as the South West LHIN. The performance data showcased areas where there is shared responsibility amongst system partners, alignment with provincial priorities, and, in some cases, opportunities for improvement.
- Members were also provided with a summary of sub-region information distilled from other key inputs including, capacity reports, provincial strategies, and meetings that occurred with individual sub-region integration table members over the summer.
- A full group facilitation occurred to further identify areas of sub-region opportunities for improvements/priorities by priority populations (as follows):
    - People who are frail and/or have medically complex conditions/disabilities
    - People living with mental health and/or addictions issues
    - People living with or at risk of chronic disease(s)
    - Indigenous populations
    - Francophone populations
- The prioritization continued through a teleconference the following week. The dot-mocracy exercise where members add their dots to the opportunities identified that they believe will have the most impact on the population for Grey Bruce, will be completed Nov 17, 2017
- In December, a number of decision-making criteria will be applied to the identified opportunities with the expected outcome to identify one to three top priorities. These results will be socialized with the broader sub-region partners in January 2018.

The Next Grey Bruce Sub-region Integration Table meeting:
December 5, 2017 1-4 pm, South West LHIN 1415 1st Ave W, Owen Sound
