Sub-region Integration Table – Huron Perth
Meeting Highlights, April 9, 2019

South West Regional Wound Care Program
Lyndsay Orr, Regional Program Lead, provided an overview of the program. outreach and wound care education to all settings. The program is spreading outreach and education beyond hospitals to all settings including Family Health Teams, with the goal to set teams up with education and tools. Primary Care is a major focus since early intervention is critical. The aim is to increase the number of specialty sites to provide interdisciplinary team based care, a best practice for wound care. Resources are available at www.swrwoundcareprogram.ca

Cardiac Hub Spoke and Node model
The protocols for the model are well mapped in relation to hub, spoke and node. Managing volume and escalation continue to be pursued via workshops and an education session. The first patient through the system is on hold pending further workshops/education session to explore the management of high referral volume and escalation.

COPD program
A lot of work has been completed regarding where the Respiratory Therapists (RTs) will be embedded. April 1 had been the mandate to have COPD care in FHTs with an (RT) embedded. Future exploration as to sharing of RT resources to ensure sustainability and provide a resource for potential other models is encouraged.

Mental Health and Addictions (MH&A)
Members of the alliance are reviewing and updating the information on the website. The work with the schedule 1 hospitals continues with data collection.

PSW Working Group
The survey responses are due April 9th. It is likely that the timeframe for completion will be extended to ensure a high response rate. The survey was sent to 180 organizations throughout the South West region.

Health Equity Initiative
The health units are developing the provider education module for health and social service organizations, with the intent that the two hour module would be offered to times/year. Perth will be the pilot for the module. The one day workshops offered by the health unit, as well as cultural humility workshops will be promoted during the module. .

Work Plan
All activities and timelines were updated. A few areas are noted below:

June 11th is the revised timeline for all SRIT members to complete the Mental Health 101 and Substance Abuse 101 online modules. The link to CAMH Mental Health & Addiction 101 online tutorials is https://moodle8.camhx.ca/moodle/

Indigenous Cultural Safety Training: To register for Indigenous Cultural Safety (ICS) training:

- Key contact of the organization (e.g. ADSTV) emails Laura Deyell at the South West LHIN, email at: Laura.Deyell@lhins.on.ca to request the number of seats needed of which type of training
- Laura submits that organization's seat number request to the ICS program
- ICS program follows up with the organization key contact to get details to register each individual ICS Training Descriptions

Build on work being undertaken with the Huron Perth Health Units.

System Transformation/Ontario Health Teams
Members discussed current information released from the ministry about the Ontario Health Teams (OHT). LHIN staff are able to participate and be observers in any meetings where invitations are extended but do not have a role in directing or leading planning, as the emphasis is for partners to self determine their teams and focus. Huron Perth Hospital Association has coordinated a meeting April 10th open to all interested. Further SRIT discussions will occur regarding the ongoing value of the SRIT table in the consideration of the OHT evolution. For the time being members expressed that the system remains fragmented and noted the desire to continue meeting as SRIT.

Next Huron Perth Sub-region Integration Table meeting:
May 14, 2019 1:00 – 4:00 pm; South West LHIN Seaforth Office

Executive Assistant: alexa.attard@lhins.on.ca
