

Access to Care eHealth Definitions	
eScreening	A short electronic screening tool for front line staff to work with patients to determine who will need a CCAC referral as early as possible while in hospital to ensure timely discharge home.
eNotification	Will provide hospital staff and physicians with automatic confirmation of the CCAC client status of patients who present or are admitted into acute care. Also will notify CCAC staff that their client is in hospital
eReferral	Provides electronic mechanisms to implement all referrals to CCAC electronically.
