

October 3, 2017

Dear Colleagues,

I am pleased to invite you to the ***first ever meeting of the Elgin Primary Care Alliance***. As a primary care provider in Elgin County, you are already a member.

As you know, a strong primary care sector is the cornerstone of a high performing, efficient and robust health care system. As the initial entry point to the health system for many patients and families, an integrated, sustainable and comprehensive primary care system also acts as the mechanism to ensure continuity of care throughout the system. The ability to effectively fulfill this role is dependent on primary care being integrated as a sector within itself and with other sectors and partners in the broader health care system. By functioning as collective, rather than independent providers, primary care will be better positioned to identify and act on sector-specific and cross-sector issues, challenges and opportunities.

As the South West LHIN continues to move forward with health system renewal plans as part of the Patients First Act, it is my hope that the valued voices of experienced local primary care providers, like yourself, will help fuel local innovation and collaboration by identifying, planning, and making recommendations for Elgin priorities through the Elgin Primary Care Alliance.
